I graduated from the Gábor Dénes High School and Technical Secondary School of Information Technology in 2007.

Then, between 2007 and 2009, I attended the school's system administrator training, I did not take the final exam. At the same time, I gained extensive computer networking knowledge in the Cisco CCNA training.

I have expanded my knowledge by self-training. I used my programming skills to create smaller applications. I am keeping my computer hardware and software knowledge up to date. I'm using C# and HLSL in Unity.

After completing my studies, I tried myself in several workplaces, mainly in the shops of commercial enterprises, as a seller.

From February 2011, I was first a petrol station worker, then a shift leader, and after that I became a petrol station manager at the J und J Kft. Here I supervised the work of 13 employees and ensured the smooth and continuous operation of the gas station. My work was done with honor and diligence, but due to the constant shortage of labor - in my opinion - I was not able to take full responsibility for my work, according to my previous practice, so in March 2018 I asked for termination of my employment. Then i worked at OMV petrol station operated by Soma 33 Bt till 2019 Oktober. As an employee of Mozaik Kiadó Kft from August 2020, I work in Unity in C # and I also write Shaders in HLSL.

I have a driving license for AM, A1, A2, A, B1, B, BE since 2007. I'm driving a lot, without accident.

I do not have a language exam, but I understand, write and read English.

I live with my girlfriend in orderly conditions, we have no children.

Szeged, 1 February 2024
